Application for the position of Systems Specialist

Dear Hiring Team,

I am writing to express my strong interest in the Systems Specialist position at Test Company. With my background in agricultural engineering, dairy science, and hands-on sensor and data analytics experience at Leibniz ATB, I offer a unique combination of scientific rigor and practical industry application.

In my current doctoral research and past projects, I have led field campaigns in commercial dairy barns, developed low-cost gas sensing systems, and integrated complex environmental and herd datasets. This experience aligns closely with Test Company's focus on innovation, technical reliability, and sustainable production.

I am particularly excited about the opportunity to contribute to Test Company by bringing deep expertise in measurement technology, statistical modeling in R/Python, and clear stakeholder communication. I hold permanent residence in Germany and am available for both on-site field visits and collaborative project work.

Thank you for considering my application. I look forward to discussing how my background and enthusiasm can support Test Company's continued success.

Yours sincerely,

Harsh Sahu
