Application for the position of Data & Reporting Analyst

Dear Recruitment Team,

I am writing to express my strong interest in the Data & Reporting Analyst position at Arcadis. With my background in agricultural engineering, dairy science, and hands-on sensor and data analytics experience at Leibniz ATB, I offer a unique combination of scientific rigor and practical industry application.

In my current doctoral research and past projects, I have led field campaigns in commercial dairy barns, developed low-cost gas sensing systems, and integrated complex environmental and herd datasets. This experience aligns closely with Arcadis's focus on innovation, technical reliability, and sustainable production.

I am particularly excited about the opportunity to contribute to Arcadis by bringing deep expertise in measurement technology, statistical modeling in R/Python, and clear stakeholder communication. I hold permanent residence in Germany and am available for both on-site field visits and collaborative project work.

Thank you for considering my application. I look forward to discussing how my background and enthusiasm can support Arcadis's continued success.

Yours sincerely,

Candidate Name
